In case of discrepancy between the Technical and Financial Proposals in indicating quantities of input, the Technical Proposal prevails and the KRA's evaluation committee shall correct the quantification indicated in the Financial Proposal so as to make it consistent with that indicated in the Technical Proposal, apply the relevant unit price included in the Financial Proposal to the corrected quantity, and correct the total Proposal cost.
- 24.3 Lump-Sum Contracts - If a Lump-Sum contract form is included in the RFP, the Consultant is deemed to have included all prices in the Financial Proposal, so neither arithmetical correction nor price adjustments shall be

- 28.1 An abnormally high price is one where the proposal price, in combination with other constituent elements of the proposal, appears unreasonably too high to the extent that the KRA is concerned that it (the KRA) may not be getting value for money, or it may be paying too high a price for the contract compared with market prices or that genuine competition between consultants is compromised.
- 28.2 In case of an abnormally high tender price, the KRA shall make a survey of the market prices, check if the estimated cost of the contract is correct, and review the RFP to check if the specifications, TOR, scope of work and conditions of contract are contributory to the abnormally high proposals. The KRA may also seek written clarification from the Consultants on the reason or the high proposal price. The KRA shall proceed as follows:
- i) If the proposal price is abnormally high based on the wrong estimated cost of the contract, the KRA may accept or not accept the proposal depending on the KRA's budget considerations.

3. APPENDIX TO FORM OF PROPOSAL ON FRAUD AND CORRUPTION CLAUSE (for information)

Purpose

the government of Kenya's Anti-Corruption and Economic Crime laws and their sanction's policies and procedures, Public Procurement and Asset Disposal Act (*no. 33 of 2015*) and its Regulation, and any other Kenya's Acts or Regulations related to Fraud and Corruption, and similar offences, shall apply with respect to Public Procurement Processes and Contracts that are governed by the laws of Kenya.

Requirements

The Government of Kenya requires that all parties including Procuring Entities, Tenderers, (applicants/proposers), Consultants, Contractors and Suppliers; any Sub-contractors, Sub-consultants, Service providers or Suppliers; any Agents (whether declared or not); and any of their Personnel, involved and engaged in procurement under Kenya's Laws and Regulation, observe the highest standard of ethics during the procurement process, selection and contract execution of all contracts, and refrain from Fraud and Corruption and fully comply with Kenya's laws and Regulations as per paragraphs 1.1 above.

Kenya's public procurement and asset disposal act (*no.33 of 2015*) under Section 66 describes rules to be followed and actions to be taken in dealing with Corrupt, Coercive, Obstructive, Collusive or Fraudulent practices, and Conflicts of Interest in procurement including consequences for offences committed. A few of the provisions noted below highlight Kenya's policy of no tolerance for such practices and behavior:

- (1) a person to whom this Act applies shall not be involved in any corrupt, coercive, obstructive, collusive or fraudulent practice; or conflicts of interest in any procurement or asset disposal proceeding;
- (2) A person referred to under sub section (1) who contravenes the provisions of that sub-section commits an offence;
- (3) Without limiting the generality of the subsection (1) and (2), the person shall be: -
 - a) disqualified from entering into a contract for a procurement or asset disposal proceeding; or
 - b) if a contract has already been entered into with the person, the contract shall be avoidable;
- (4) The voiding of a contract by the procuring entity under subsection (7) does not limit any legal remedy the procuring entity may have;
- (5) An employee or agent of the procuring entity or a member of the Board or committee of the procuring entity who has a conflict of interest with respect to a procurement—
 - i) Shall not take part in the procurement proceedings;
 - ii) shall not, after a procurement contract has been entered into, take part in any decision relating to the procurement or contract; and
 - iii) Shall not be a sub-contractor for the tender to whom was awarded contract, or a member of the group of tenderers to whom the contract was awarded, but the sub-contractor appointed shall meet all the requirements of this Act.
- (6) An employee, agent or member described in subsection (1) who refrains from doing anything prohibited under that subsection, but for that subsection, would have been within his or her duties shall disclose the conflict of interest to the procuring entity;
- (7) If a person contravenes sub section (1) with respect to a conflict of interest described in subsection (5)(a) and the contract is awarded to the person or his relative or to another person in whom one of them had a direct or indirect pecuniary interest, the contract shall be terminated and all costs incurred by the public entity shall be made good by the awarding officer.
- (8) Incompliance with Kenya's laws, regulations and policies mentioned above, the Procuring Entity:
 - a) Defines broadly, for the purposes of the above provisions, the terms set forth below as follows:
 - i) “corrupt practice” is the offering, giving, receiving, or soliciting, directly or indirectly, of anything of value to influence improperly the actions of another party;

- ii) “fraudulent practice” is any act or omission, including misrepresentation, that knowingly or recklessly misleads, or attempts to mislead, a party to obtain financial or other benefit or to avoid an obligation;
 - iii) “collusive practice” is an arrangement between two or more parties designed to achieve an improper purpose, including to influence improperly the actions of another party;
 - iv) “coercive practice” is impairing or harming, or threatening to impair or harm, directly or indirectly, any party or the property of the party to influence improperly the actions of a party;
 - v) “obstructive practice” is:
 - i) deliberately destroying, falsifying, altering, or concealing of evidence material to the investigation or making false statements to investigators in order to materially impede investigation by Public Procurement Regulatory Authority (PPRA) or any other appropriate authority appointed by Government of Kenya into allegations of a corrupt, fraudulent, coercive, or collusive practice; and/or threatening, harassing, or intimidating any party to prevent it from disclosing its knowledge of matters relevant to the investigation or from pursuing the investigation; or
 - ii) Acts intended to materially impede the exercise of the PPRA's or the appointed authority's inspection and audit rights provided for under paragraph 2.3e. below.
- b) Defines more specifically, in accordance with the above procurement Act provisions set forth for fraudulent and collusive practices as follows:
- "fraudulent practice" includes a misrepresentation of fact in order to influence a procurement or disposal process or the exercise of a contract to the detriment of the procuring entity or the tenderer or the contractor, and includes collusive practices amongst tenderers prior to or after tender submission designed to establish tender prices at artificial non-competitive levels and to deprive the procuring entity of the benefits of free and open competition.
- c) Rejects a proposal or award¹ of a contract if PPRA determines that the firm or individual recommended for award, any of its personnel, or its agents, or its sub-consultants, sub-contractors, service providers, suppliers and/ or their employees, has, directly or indirectly, engaged in corrupt, fraudulent, collusive, coercive, or obstructive practices in competing for the contract in question.
 - d) Pursuant to the Kenya's above stated Acts and Regulations, may sanction or debar or recommend to appropriate authority (ies) for sanctioning and debarment of a firm or individual, as applicable under the Acts and Regulations.
 - e) Requires that a clause be included in Tender documents and Request for Proposal documents requiring (i) Tenderers (applicants/proposers), Consultants, Contractors, and Suppliers and their Sub-contractors, Sub-consultants, Service providers, Suppliers, Agents personnel, permit the PPRA or any other appropriate authority appointed by Government of Kenya to inspect² all accounts, records and other documents relating to the procurement process, selection and/or contract execution, and to have them audited by auditors appointed by the PPRA or any other appropriate authority appointed by Government of Kenya; and
 - f) Pursuant to Section 62 of the above Act, requires Applicants/Tenderers to submit along with their Applications/Tenders/Proposals a “Self-Declaration Form” as included in the procurement document declaring that they and all parties involved in the procurement process and contract execution have not engaged/will not engage in any corrupt or fraudulent practices.

¹For the avoidance of doubt, a party's ineligibility to be awarded a contract shall include, without limitation, (i) applying for pre-qualification, expressing interest in

A consultancy, and tendering, either directly or as a nominated sub-contractor, nominated consultant, nominated manufacturer or supplier, or nominated service provider, in respect of such contract, and (ii) entering into an addendum or amendment introducing a material modification to any existing contract.

² Inspections in this context usually are investigative (i.e., forensic) in nature. They involve fact-finding activities undertaken by the Investigating Authority or persons appointed by the KRA to address specific matters related to investigations/audits, such as evaluating the veracity of an allegation of possible Fraud and Corruption, through the appropriate mechanisms. Such activity includes but is not limited to: accessing and examining a firm's or individual's financial records and information, and making copies thereof as relevant; accessing and examining any other documents, data and information (whether in hard copy or electronic format) deemed relevant for the investigation/audit, and making copies thereof as relevant; interviewing staff and other relevant individuals; performing physical inspections and site visits; and obtaining third party verification of information.

ADDITIONAL NOTES TO FORM FIN-2

Performance-Based Commercial Model (PBCM) where the vendor’s remuneration is directly tied to measurable performance indicators, including legitimate stamp volumes, demonstrable reduction of illicit trade, and overall excise revenue growth as described in the technical and functional requirements.

1. Market Context and Objectives

The commercial framework shall be a Performance-Based Commercial Model (PBCM) using a progressive ratcheting pricing structure. This model prices each incremental batch of stamps at the tier it achieves, creating strong incentives for the vendor to exceed each milestone.

2. Progressive Ratcheting Payment Structure

The PBCM uses a progressive ratcheting mechanism where each incremental batch of stamps is priced at the tier it achieves, rather than applying a single price to all stamps. All costs, including system implementation, operations, maintenance, and support, must be bundled into the price per thousand stamps. No separate fixed payments will be made for any service component.

3. Progressive Ratcheting Pricing Formula

Price per 1,000 stamps = Base Price (Po) × (1 + Revenue Tier Adjustment + Volume Tier Adjustment)

4. Revenue Tier Structure (Incremental)

Revenue Tier	Annual Excise Revenue Range	Revenue Adjustment
	:---	:---
R1 (Baseline)	Up to KES 100B	+0%

R4	KES 160.01B - 190B	+9%
R5 (Target)	KES 190.01B and above	+12%

5. Volume Tier Structure (Progressive Ratcheting)

Volume Tier	Annual Stamp Volume Range	Volume Adjustment

6. FORM FIN 3D: BREAKDOWN OF REMUNERATION RATES [FOR TIME BASED CONTRACTS ONLY]

1. Review of Remuneration Rates

- 1.1 The remuneration rates are made up of salary or abase fee, social costs, overheads, profit, and any premium or allowance that may be paid for assignments away from headquarters or a home office. Form FIN3 C can be used to provide a breakdown of rates.
- 1.2 The Form FIN 3C shall be completed and attached to the Financial Form-3. As agreed at the negotiations, breakdown sheets shall form part of the negotiated Contract and included in its Appendix D or C.
- 1.3 At the negotiations the firm shall be prepared to disclose its audited financial statements for the last three years, to substantiate its rates, and accept that its proposed rates and other financial matters are subject to scrutiny. The KRA is charged with the custody of government funds and is expected to exercise prudence in the expenditure of these funds.

2 Rate details are discussed below:

- (i) Salary is the gross regular cash salary or fee paid to the individual in the firm's home office. It shall not contain any premium for work away from headquarters or bonus, except where these are included bylaw or government regulations.
- (ii) Bonuses are normally paid out of profits. To avoid double counting, any bonuses shall not normally be included in the "Salary" and should be shown separately. Where the Consultant's accounting system is such that the percentages of social costs and overheads are based on total revenue, including bonuses, those percentages shall be adjusted downward accordingly. Where national policy requires that 13 months' pay be given for 12 months' work, the profit element need not be adjusted downward. Any discussions on bonuses shall be supported by audited documentation, which shall be treated as confidential.
- (iii) Social Charges are the costs of non-monetary benefits and may include, inter alia, social security (including pension, medical, and life insurance costs) and the cost of a paid sick and/or annual leave. In this regard, a paid leave during public holidays or an annual leave taken during an assignment if no Expert's replacement has been provided is not considered social charges.

- (iv) Cost of Leave The principles of calculating the cost of total days leave per annum as a percentage of basic salary is normally calculated as follows:

$$\text{Leave cost as percentage of salary} = \frac{\text{total days leave} \times 100}{[365 - w - ph - v - s]}$$

Where w = weekends, ph = public holidays, v = vacation, and s = sick leave.

Please note that leave can be considered as a social cost only if the KRA is not charged for the leave taken.

- (v) Overheads are the Consultant's business costs that are not directly related to the execution of the assignment and shall not be reimbursed as separate items under the Contract. Typical items are home office costs (non-billable time, time of senior Consultant's staff monitoring the project, rent of headquarters' office, support staff, research, staff training, marketing, etc.), the cost of Consultant's personnel not currently employed on revenue-earning projects, taxes on business activities, and business promotion costs. During negotiations, audited financial statements, certified as correct by an independent auditor and supporting the last three years' over heads, shall be available for discussion, together with detailed lists of items making up the overheads and the percentage by which each relates to basic salary. The KRA does not accept an add-on margin for social charges, overhead expenses, etc. for Experts who are not permanent employees of the Consultant. In such case, the Consultant shall be entitled only to administrative costs and a fee on the monthly payments charged for sub-contracted Experts.
- (vi) Profit is normally based on the sum of the Salary, Social costs, and Overheads. If any bonuses paid on a regular basis are listed, a corresponding reduction shall be made in the profit amount. Profit shall not be allowed on travel or any other reimbursable expenses.

- (vii) Away from Home Office Allowance or Premium or Subsistence Allowances Some Consultants pay

allowances to Experts working away from headquarters or outside of the home office. Such allowances are calculated as a percentage of salary (or a fee) and shall not draw over heads or profit. Sometimes, by law, such allowances may draw social costs. In this case, the amount of this social cost shall still be shown under social costs, with the net allowance shown separately.

7. FORM FIN-4 BREAKDOWN OF REIMBURSABLE

When used for Lump-Sum contract assignment, information to be provided in this Form shall only be used to demonstrate the basis for calculation of the Contract ceiling amount, to calculate applicable taxes at contract negotiations and, if needed, to establish payments to the Consultant for possible additional services requested by the KRA. This form shall not be used as a basis for payments under Lump-Sum contracts. This form shall be filled for Time-Based Contracts to form the basis of contract negotiations.

SECTION 5. TERMS OF REFERENCE

TERMS OF REFERENCE FOR THE SUPPLY, DELIVERY, INSTALLATION, COMMISSIONING, AND MAINTENANCE OF AN INTEGRATED EXCISABLE GOODS MANAGEMENT SYSTEM (EGMS)

1.1 Introduction

The Kenya Revenue Authority (KRA), established under Cap. 469 of the Laws of Kenya, is mandated to assess, collect, and account for all revenues on behalf of the Government of Kenya. Pursuant to the Excise Duty Act, 2015 and the Excisable Goods Management System (EGMS) Regulations, 2017, the Authority seeks to implement a next-generation Integrated Excisable Goods Management System (EGMS).

The system is aimed at addressing the multiplicity of threats KRA faces in administering EGMS. The threats include those associated with tax evasion, illicit trade, cybercrime, terrorism, and sabotage by internal and external sources, as well as risks associated with staff integrity.

1.2 Purpose of the EGMS

The objective of the EGMS is to provide a secure, end-to-end digital platform capable of:

- Tracking, tracing, and authenticating all excisable goods manufactured in, or imported into, Kenya across their entire supply chain.
- Detecting and deterring illicit production, diversion, smuggling, stamp counterfeiting, under-declaration, and tax evasion.
- Providing real-time visibility and analytics to KRA enforcement teams, partner agencies, and policy makers.
- Enhancing revenue performance through formalization of previously illicit or informal markets.
- Ensuring national security interests by preventing misuse of excisable goods channels for criminal or subversive activities.

1.3 Justification

Current assessments indicate that over 50% of excisable products may be illicit or non-compliant, resulting in significant revenue leakage and market distortion. KRA therefore requires a comprehensive EGMS that incorporates the highest levels of security, serialization, geospatial intelligence, IoT integration, cyber-resilience, and AI-driven risk analytics.

The proposed solution must provide the following minimum requirements:

- a) A track and trace technology that meets the requirements of EGMS regulations, tracking excisable products from production to point of sale and the Framework Convention on Tobacco Control (FCTC) Protocol to Eliminate Illicit Trade in Tobacco Products.
- b) A secure marking of excisable goods with support for both digital and physical markings.
- c) The solution should include the requisite equipment, hardware, software, and consumables that are necessary for the implementation of the system.
- d) A centralized center of excellence to provide effective real-time monitoring, enforcement, and analytics across all classes of goods, both local and imported.
- e) Out-of-box data analytics (reports and dashboards) supported by customizable analytics and business intelligence tools. The solution should be able to expose all its data models to the Enterprise Data Warehouse.
- f) Open APIs for all functionalities to provide the capability for integration with other relevant KRA systems, Government Regulatory Systems, and Partnering EAC Countries.
- g) Transparent and direct access and control of the system by the Authority.
- h) Reliable consumer verification system(s) for verification of genuine products in the market, i.e., secure marking.
- i) System(s)/tools for verification of secure markings by authorized KRA law enforcement officers.

- j) An automated approval process for ordering and delivery of secure markings.
- k) Capability to account for the delivery of excisable goods (tracking across the supply chain) and to perform excise tax projections and simulations.
- l) Secure and user-friendly system, with mobile-first access for users.
- m) Capacity building for relevant stakeholders, including target KRA staff. Secure, modern, and scalable solution(s), interoperable with existing and future factory monitoring equipment and agnostic to hosting hardware, with end-to-end encryption at all points of integration and data transmission.
- n) The system must address the following challenges –
- o)
 - Counterfeit stamps in circulation.
 - Under-declaration of production.
 - Smuggling across porous borders.
 - Internal process vulnerabilities.
 - Weak real-time visibility of distribution network
 - Limited consumer engagement in authentication.
- p) The system must cater to:
 - Highly diverse and geographically distributed producers.
 - Varied levels of production automation from fully automated to manual processes.
 - Product categories including tobacco, beverages, spirits, wines, RTDs, water, juices, cosmetics, among others.

1.4 Current Landscape of the Stamps Regime in Kenya

Kenya's excisable goods market comprises over 1,800 manufacturers and 1,200 importers. Approximately 3 billion stamps are currently issued annually; however, market intelligence suggests potential for over 6 billion legitimate stamps once the illicit market is formalized.

	Product	Estimated Number of Production Plants	Estimated Number of Automated Lines	Estimated Number of Importers
	Tobacco products	1	8	150
	Beer	13	6	170
	Spirit	36	38	282
	wine	2	2	300
	RTD	3	20	46
	Soft drinks and juices	100	70	243
	Bottled water	1,659	68	27
	TOTAL	1,814	212	1,218

NOTES:

1. The manufacturers and importers are spread out across the country.
2. The current estimated number of excise stamps is 3.5 billion annually.
3. The numbers provided above are based on the current estimates and, therefore, may be subject to change.

SECTION 6. CONDITIONS OF CONTRACT AND CONTRACT FORMS

A. PREFACE

1. This Section includes two types of standard contract forms for: A Lump-Sum Contract and a Time-Based Contract. Each type includes General Conditions of Contract (“GCC”) that shall not be modified, and Special Conditions of Contract (“SCC”). The SCC includes clauses specific to each contract to supplement, but not over- write or otherwise contradict, the General Conditions of Contract.
2. Lump-Sum Contract. This type of contract is used mainly for assignments in which the scope and the duration of the Services and the required output of the Consultant are clearly defined. Payments are linked to outputs (deliverables) such as draft or final reports, drawings, bill of quantities, bidding documents, or software programs. Lump-sum contracts are easier to administer because they operate on the principle of a fixed price for a fixed scope, and payments are due on clearly specified outputs and milestones. Never the less, quality control of the Consultant's outputs by the KRA s paramount.
3. Time-Based Contract. This type of contract is appropriate when it is difficult to define or fix the scope and the duration of the services, either because they are related to activities carried out by others for which the completion period may vary, or because the input of the consultants required for attaining the objectives of the assignment is difficult to assess. In time-based contracts the Consultant provides services on a timed basis according to quality specifications, and Consultant's remuneration is determined on the basis of the time actually spent by the Consultant in carrying out the Services and is based on (i) agreed upon unit rates for the Consultant's experts multiplied by the actual time spent by the experts in executing the assignment, and (ii) reimbursable expenses using actual expenses and/or agreed unit prices. This type of contract requires the KRA to closely supervise the Consultant and to be involved in the daily execution of the assignment.
4. The templates are designed for use in assignments with consulting firms and shall not be used for contracting of individual experts. In some consultancy assignments such as design and construction supervision, both Lump- Sum and Time-Based Contracts are used and signed with the Consultant. In that case, the Lump-Sum Contract would apply for the design part of the Services while the construction supervision part would be based on a Time- Based Contract. In such event, both types of contracts shall be signed at the same time.

Appendix E - Preface

This Section includes a Time-Based Contract. It includes General Conditions of Contract (“GCC”) that shall not be modified, and Special Conditions of Contract (“SCC”). The SCC include clauses specific to each contract to supplement, but not over-write or otherwise contradict, the General Conditions of Contract.

Time-Based Contract. This type of contract is appropriate when it is difficult to define or fix the scope and the duration of the services, either because they are related to activities carried out by others for which the completion period may vary, or because the input of the consultants required for attaining the objectives of the assignment is difficult to assess. In time-based contracts the Consultant provides services on a timed basis according to quality specifications, and Consultant's remuneration is determined on the basis of the time actually spent by the Consultant in carrying out the Services and is based on (i) agreed upon unit rates for the Consultant's experts multiplied by the actual time spent by the experts in executing the assignment, and (ii) reimbursable expenses using actual expenses and/or agreed unit prices. This type of contract requires the KRA to closely supervise the Consultant and to be involved in the daily execution of the assignment.

The template is designed for use in assignments with consulting firms and shall not be used for contracting of individual experts. In some consultancy assignments such as design and construction supervision, both Lump-Sum and Time- Based Contracts are used and signed with the Consultant. In that case, the Lump-Sum Contract would apply for the design part of the Services while the construction supervision part would be based on a Time-Based Contract. In such event; both types of contracts shall be signed at the same time.

In case a Time-Based Contract is not used, please delete the contract template for time-based contract before issuance of the RFP to Consultants.

¹The Guarantor shall insert an amount representing the amount of the advance payment and denominated either in the currency (ies) of the advance payment as Specified in the Contract, or in a freely convertible currency acceptable to the KRA.

²Insert the expected expiration date. In the event of an extension of the time for completion of the Contract the KRA would need to request an extension of This guarantee from the Guarantor. Such request must be in writing and must be made prior to the expiration date established in the guarantee. In preparing this guarantee, the KRA might consider adding the following text to the form, at the end of the pen ultimate paragraph: “The Guarantor agrees to a one-time extension of this guarantee for a period not to exceed [six months] [one year], in response to the KRA's written request for such extension, such request to be presented to the Guarantor before the expiry of the guarantee.”
